

3D flight paths (colour = altitude [m])

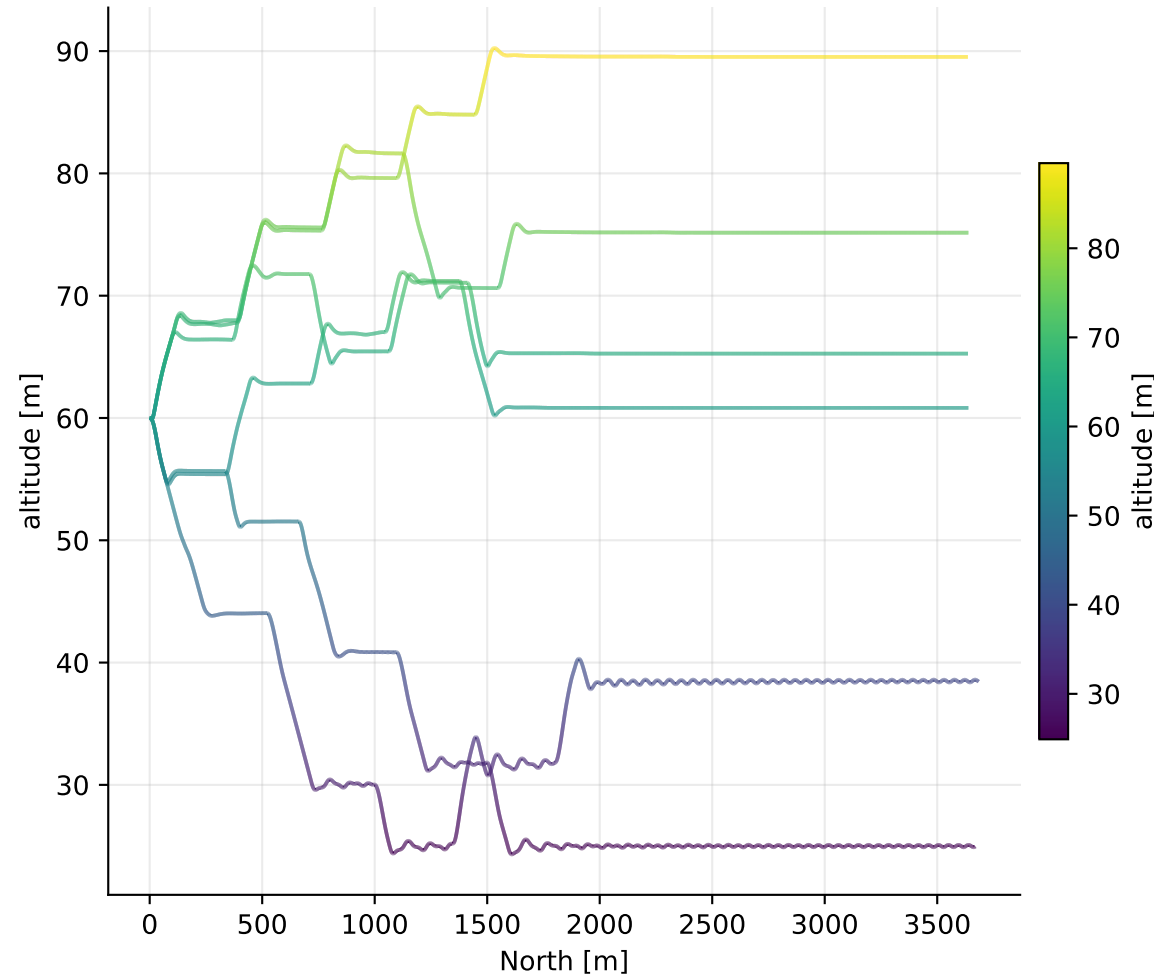

altitude tracking (— achieved, -- commanded, ● injected)

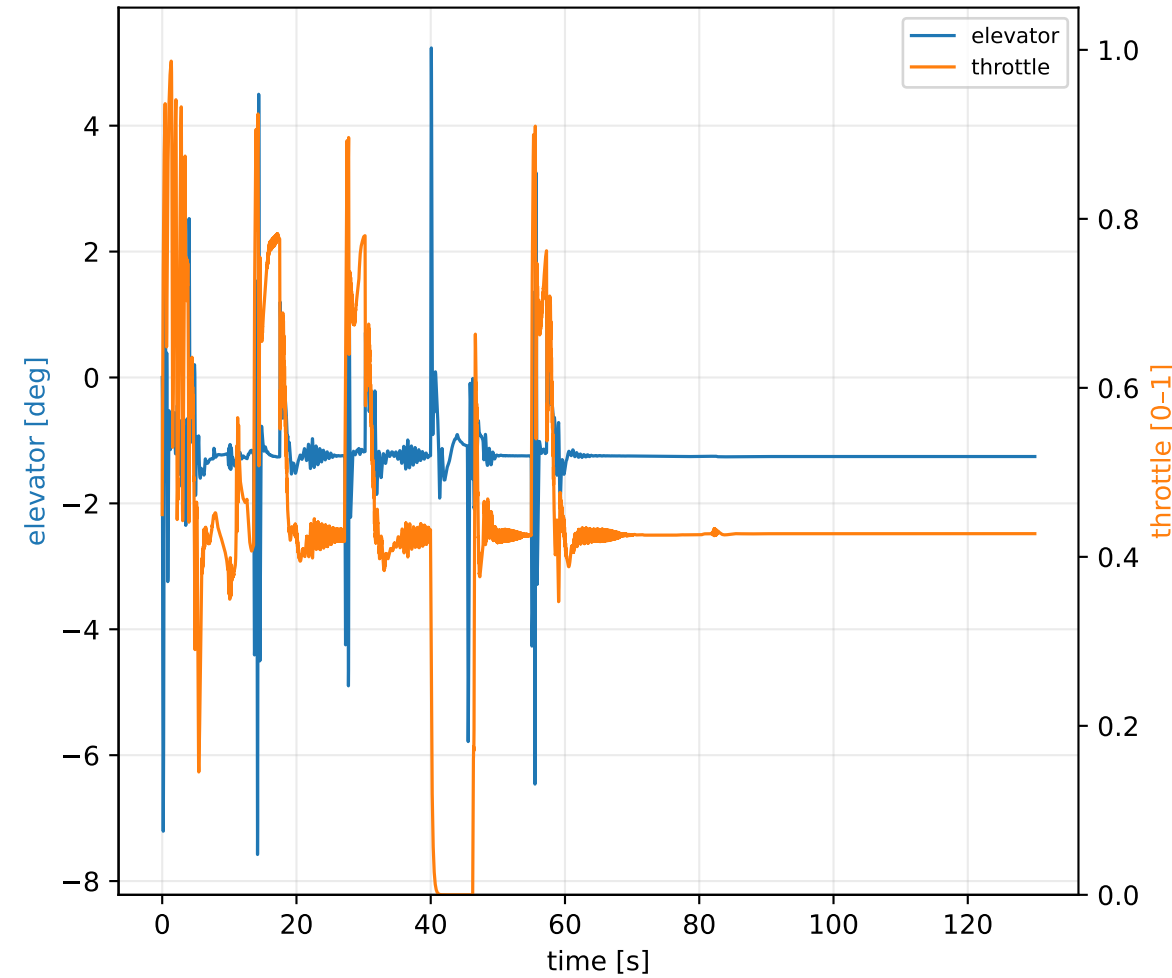

tracking error — 256 Monte Carlo episodes (10-90% band)

side view (colour = altitude [m])

controls — representative episode

Random altitude-waypoint generation
and Monte Carlo Simulations

N = 256 episodes $\times$ 5 altitude targets

Full completion: 100%
Mean captured: 5.00 / 5
Settled RMSE: 0.05 m

Constraints:
Altitude rate < 2.0 m/s
No stall / crash
